

Streamline crisis response with mobile dispatch

A comprehensive and configurable mobile dispatch solution

Cohesively track client progress

Manage the client journey centrally and streamline internal communications. Seamlessly input case details with pre-built workflows and standards-based assessments.

Streamline dispatch process

Safely assess, prioritize, and refer clients to care utilizing bi-directional information sharing between dispatch and field teams.

Scale across teams

Ensure a timely response and increase coordination between agency and field teams. Expand to additional teams as necessary.

Configure to match your needs

Rapidly deploy mobile dispatch out-of-the-box, and then seamlessly configure to suit your team's unique workflows.
